

communiteer
the social good network

Our mission is to facilitate social impact via cross-sector collaboration.

We're building an online community where individuals, for-purpose organisations, and corporations connect and collaborate to amplify their collective impact through crowdsourcing.

We would like to invite you, your organisation, and your staff members to join us in creating a truly inclusive and collaborative community through the use of technology.

How does it work?

We use technology as a force for good to facilitate social impact at scale.

Our online community is purpose-built to foster social participation and engagement by combining the technology behind social media platforms and online marketplaces.

Through the power of crowdsourcing, we harness our collective resources and divert them to where it's needed. Each organisation and each user contributes to the social good network by sharing stories, information, knowledge, connections, skills, opportunities and time. Our platform collates these 'resources' and distributes them to each user's newsfeed based on their personal preferences and values. Users can then choose what they participate in and how they contribute to the social causes they believe in online and offline.

Causes

SOCIAL AWARENESS

We help individuals and organisations discover, learn and align themselves with the UN Sustainable Development Goals that they believe in.

Contributions

SOCIAL PARTICIPATION

We work with organisations to create opportunities for individuals to get involved that will contribute towards the UN Sustainable Development Goals.

Communities

SOCIAL INCLUSION

We enable values-aligned individuals and mission-aligned organisations to collaborate with one another through online communities.

Why join Communiteer?

We exist to strengthen the community sector and we work collaboratively across different stakeholder groups.

Your staff will develop deeper engagement and a shared purpose for causes your organisation stands for. They will hear inspiring stories from charities they support, connect with their colleagues across different teams to share their experiences, and access a variety of volunteering opportunities that align with their skills and availability.

Your organisation will become part of the social good network where you are more likely to achieve your CSR targets or implement your corporate volunteering program. There will be a greater selection of organisations to collaborate with, a variety of opportunities to create social impact, and all the contributions made by your organisation and your staff will be reportable and measureable against the United Nations Sustainable Development Goals.

Join our social movement!

We invite your organisation and your members to join our growing community.

We will work closely with you and your key stakeholders to engage your staff members through our online platform.

We will provide your organisation with:

- Full access to our crowdsourcing platform;
- Technical support for you and your staff members;
- Action plans to engage your staff virtually;
- Invitation to participate at our events and webinars;
- Templates to identify ways to create social impact; and
- Impact reports based on the UN Sustainable Development Goals.

Together, we can turn scarcity into abundance and create a sustainable community sector.
